

CHRIS

**A Trusted AI Assistant for
Premium Audit Adeptness**

Streamline Premium Audits with CHRIS

Premium audits are complex, time-consuming, and prone to inconsistencies that can impact accuracy and compliance. CHRIS simplifies the process by uncovering missing information, validating documents, and enforcing regulatory standards. As a role-based AI assistant, CHRIS manages high-volume audits, expands team capacity, and delivers precise, tailored risk assessments. The result: consistent multi-state compliance, greater efficiency, and a smoother end-to-end audit experience.

- ✓ Performs real-time audit tasks with precision, reducing errors and omissions.
- ✓ Adapts and learns, improving accuracy with every interaction.
- ✓ Maintains full compliance by dynamically applying regulatory updates.
- ✓ Integrates seamlessly into existing processes and manages premium audit workloads.

Unleash the Power of AI in Premium Audit Tasks

Cognitive Insights

Leverages advanced machine learning to interpret complex policy data.

Predictive Analysis

Identifies potential discrepancies before they impact the bottom line.

Adaptive Learning

Refines audit accuracy continuously through every interaction.

Real-time Collaboration

Streamlines communication between auditors and policyholders.

CHRIS Workflow Summary

1

Document Intake

Extracts key policy and payroll data from submission documents.

2

Data Validation and Classification

Verifies data accuracy and applies correct categorizations based on embedded rule sets.

3

Anomaly Detection and Compliance Monitoring

Identifies data discrepancies and validates against regulatory requirements.

4

Audit Transparency and Reporting

Delivers a complete audit trail of assistant decisions, ensuring transparency and regulatory readiness.

Use Case

Problem

Auditors tackle commercial premium audits by manually reviewing policy documents and state-specific guidelines, consuming time and resources.

Solution

CHRIS, an autonomous premium audit AI assistant, scrutinizes submission documents, identifies missing or incomplete information, applies state regulations, and manages workflows, to streamline the process with precision.
